

## Special Rubber Sheets

### Portable water rubber sheet

water intended for human consumption without imparting any toxic effect is drinking. Water .water of sufficient quality to serve as drinking water is termed as potable water whether it is used as such or not .

the non metallic materials can cause changes in water quality when it comes in contact with it .

Testing of products for use in contact with drinking water and any non-metallic product should comply with these test requirements for getting the approval given by water quality center (WQC).

We developed for using in contact with drinking water which has been met all the technical & biological property requirements as tested by following the corresponding standards.

We are high performance and low specific gravity 1.13 EPDM rubber compound which can be applied for water fitting parts e.g., lining , joining, gaskets, membranes, cisterns, o-rings, washers that are used in contact with drinking water.

Code	Specific Gravity	Hardness (+/- 5)	Tensile Strength	Elongation at break	Temp. Range	Colour
	gm/cm <sup>3</sup>	Shore A	(min) kg/cm <sup>2</sup>	(min) %	°C	
KPR 45	1.13	70	115	350	-30 to +130	Black

Standard Length : 10 Mtr.

Standard Width : 1.2/1.4/1.5 Mtr.

#### Note-

- one side or both side smooth or fabric finish or buffed finish can be supplied .
- specifications are subject to change without notice .
